

Print Versyss Statements to Laser Printers!

Versyss is excited to offer a new service to our valued customers – Statement printing to Laser on your own customized form! This service is now available for users of our new VTERM emulator product. Versyss will create a customer statement overlay with your logo and address information and set up the printing feature on the PC or PCs of your choice that has access to networked or slaved printers. VTERM users will also be able to print these statements to PDF files that can be saved or emailed, or sent out via your fax software.

All that is needed is a graphic file of your logo (JPEG or GIF file preferred), and your address information for remittance, and our team will create your statement, install it and train you on it's use.

For more information and pricing, log a support call at 800-966-4031, or email jblovits@versyss.com
